

What's So Amazing About Room A-113?

Mrs. Rasmussen's Kindergarten classroom is located in A wing, room 113. Therefore, we are room A-113. This room number is special to our class for early learning, teamwork, perseverance, hard work, and creativity. See how we share the same room number with other famous creators.

A113 simply refers to the classroom number where many Disney animators learned their craft at the California Institute of Arts. This room was used for first year graphic design and character animation, where many of the animators at Pixar and Disney (and other studios) were taught. By putting "A113" somewhere in the film, these animators are able to remember their great beginnings. We will do the same.
